PROFESSIONAL SUMMARY

Computer Systems Engineering (B.Sc. in progress) at Al-Azhar University with hands-on experience in requirements analysis, project coordination, and technical mentoring. Team Lead of the 3rd-place team at the CodeMap Innovation Hackathon 2026, selected for incubation by Makan and pre-incubation by Flow Accelerator; subsequently selected as a Co-Mentor at TAQAT Academy, supporting 25+ technical projects. Contributed to humanitarian data collection with International Medical Corps using ODK. Seeking internship, part-time, or junior opportunities in systems analysis, project coordination, or data and program support.

EXPERIENCE

Technical Co-Mentor Jul 2026 – Present
TAQAT Academy, CodeMap Program | *Gaza*

- Mentored 25+ technical projects across all stages, from requirements gathering to system design and final presentation.
- Reviewed 15+ SRS documents, 15+ system design files, and 20+ project presentations, providing structured feedback.
- Delivered 7+ sessions on SRS, user stories and scenarios, project management methodologies (Agile, Waterfall), clean code, and how to make technical presentations.

Volunteer Data Entry Clerk & Field Coordination Support Aug 2023 – Oct 2024
International Medical Corps (IMC) | *Gaza*

- Assisted in launching and implementing the "Find and Treat" program targeting Severe Acute Malnutrition (SAM) among children and pregnant and lactating women.
- Worked in a 5-person field team covering 10+ areas of Deir al-Balah, collecting and verifying sensitive beneficiary data via ODK and paper forms in line with data protection principles.
- Coordinated with field teams to facilitate timely hospital referrals for critical medical cases.

PROJECTS

Wasel: Generator Subscription Management Platform | Team Lead & Requirements Analyst | CodeMap Innovation Hackathon 2026, 3rd Place

- Led a team of 5: analyzed requirements, wrote user stories and scenarios, assigned tasks, and followed up on each member's progress.
- Prepared and delivered the full final presentation; team placed 3rd and was selected for incubation by Makan incubator and for pre-incubation by Flow Accelerator.
- Team stack: React, Laravel, Flutter, UI/UX.

E-commerce Web Application | University Project | PHP, MySQL, HTML, CSS, Bootstrap

- Independently designed and developed the entire application from start to finish, hand-coded from scratch.
- Built core features: product catalog, shopping cart, order management, and admin panel.
